

Together, through education and positive partnerships, we can proactively reduce youth injury rates.

As a valued ComplyWorks client, we would like to take this opportunity to advise you of our new initiative that helps provide safety training courses to youths in the communities in which we live and work.

Safety in Schools has made significant strides in helping to change these statistics over the last few years. Below are a few examples of the impact the foundation has had to date:

Safety in Schools provides courses in over 105 high schools across Alberta

Students have enrolled in over 15 100 Safety in Schools courses.

More than 7,600 online courses have been mastered by Alberta high school students.

For more information on the measures ComplyWorks and Safety in Schools are taking to make a difference, to purchase on-line safety training courses for your employees, or to become a corporate sponsor of the Safety in Schools Foundation, please contact:

ComplyWorks is a founding partner of the Safety in Schools Foundation of Canada, a non-profit organization which was created to deliver online safety training courses, at no cost, to high school students. The mission of Safety in Schools is to reduce and eliminate the very shocking statistics that affect our young workforce. Did you know:

- Every 17 minutes a young worker is injured on the job in Canada, and,
- an average of 7 young worker fatalities are accepted by WCB Alberta each year.

To help continue this success, ComplyWorks has created an initiative to provide increased funding to Safety in Schools. When any organization purchases online safety training courses through ComplyWorks, 25% of the purchase price will be donated to the Safety in Schools Foundation, helping provide additional youth with relevant safety training courses.

ComplyWorks' online courses allow individuals to take industry-recognized training from anywhere with an internet connection. For more information on the many courses offered [please visit our website](#).
